

Let's Invest in Los Angeles County

MAKE IT FAIR

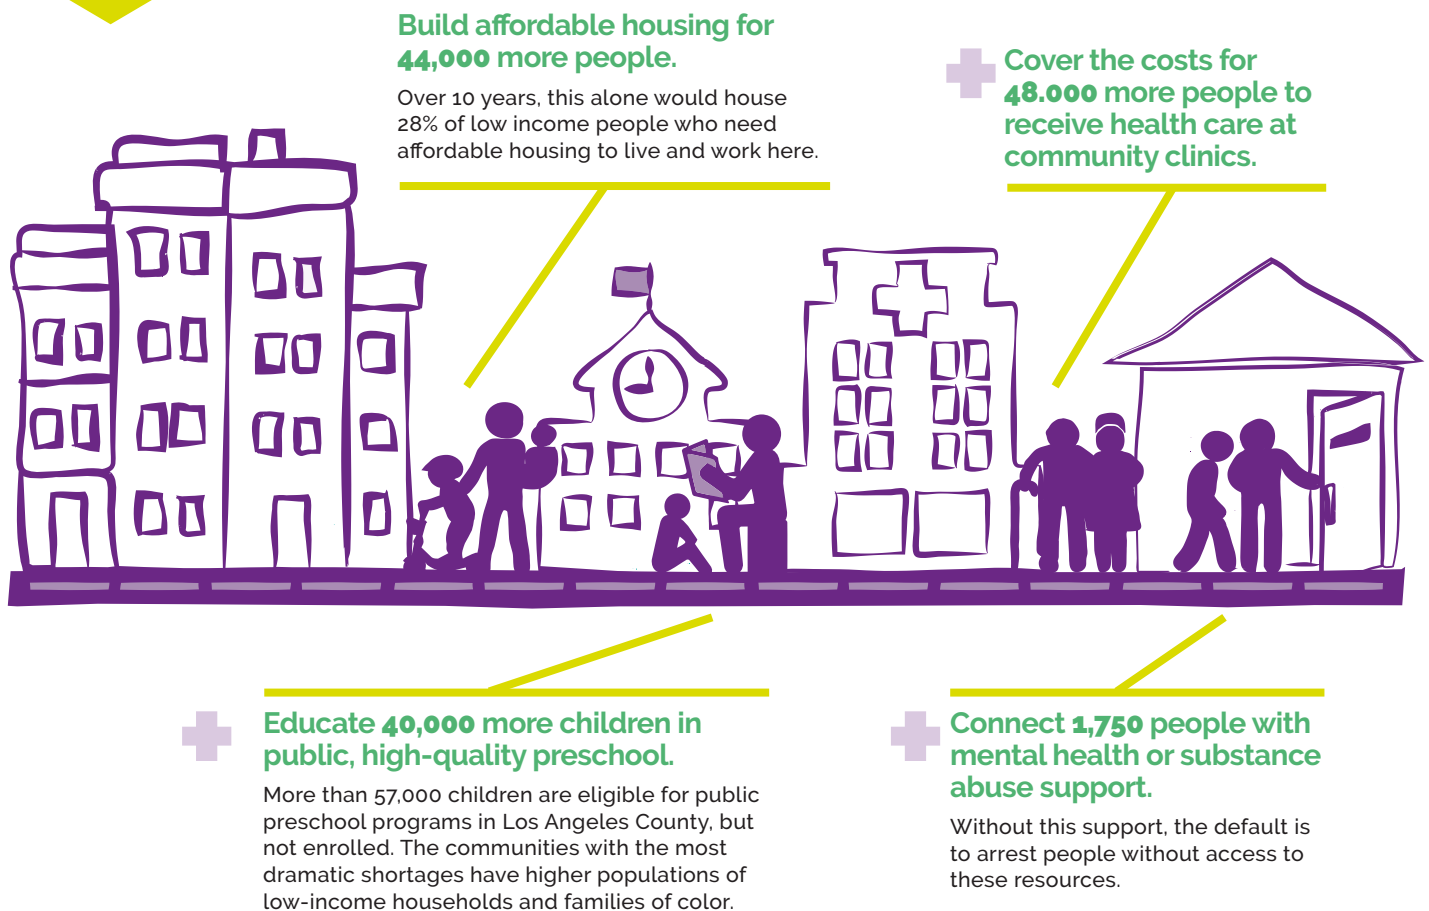

We must close the commercial property tax loophole in California and make corporations pay their fair share.

Millionaires, billionaires, and big corporations across California get a tax break worth up to \$11 billion every year. In LA County alone we can restore up to \$3.63 billion per year, and use \$2.26 billion of it for community services with the rest going to public education.

Imagine *all* we can invest in with \$2.26 billion each year:

About the Loophole

Prop 13 was passed to keep property taxes from rising faster than the incomes of homeowners, but a loophole allows big corporations and rich commercial real estate investors to avoid paying their fair share. Make It Fair closes this loophole and guarantees Prop 13 remains in effect with no changes for homeowners and residential renters.
